

TRANSFORM YOUR BUSINESS WITH WORKDAY FINANCIAL MANAGEMENT SOLUTIONS FROM TOPBLOC

Partner with TopBloc to transform your finance and accounting systems and optimize your business with a new Workday system built specifically for your organization's unique needs.

TOPBLOC'S APPROACH

MORE THAN JUST A DEPLOYMENT

TopBloc's expert team creates a cross-functional experience to allow you to focus on improving processes throughout your deployment. Unlike other firms which separate or silo service lines for advisory, operational, and strategic leadership, our clients work with one unified team of TopBloc's Workday experts to allow for more seamless collaboration.

The dedicated team at the core of your deployment is charged with configuring your Workday tenant to your exact specifications. With CPAs accounting for over one-third of our consultants, you can trust TopBloc to provide insights born from comprehensive product expertise, professional qualifications, and years of industry expertise. This allows you to rely on our team not only for configuration but for consultation toward a deployment as transformative as you would like it to be.

TopBloc works with you to analyze your current accounting architecture, facilitate meaningful design discussions, and provide a prescriptive recommendation. Rather than simply migrating your old system directly to Workday, our team works with you to transform your business, automating your processes to make them more dynamic, efficient, and scalable.

ONBOARD

TopBloc gathers key information before the first design session and uses it to transform legacy organizational data into Workday organizations and worktags.

ARCHITECT

Using the Tenant prepared during the onboarding, TopBloc partners with your team to demonstrate how your organization can best leverage the Workday architecture.

REFINE

Through the design process, TopBloc collaborates with your team to make iterative updates and guide testing to ensure that the configuration is optimized, effective, and efficient.

LESS WORK, MORE WORKDAY

TopBloc combines innovative technology with the expertise of a Workday services provider that has led over 150 launch deployments in the past 5 years to deliver our customers tailored solutions.

Our SmartLoader tool allows for a more agile deployment by automating historically manual processes. With SmartLoader, TopBloc enables clients to see the results of their new Workday tenant up to 6 weeks earlier than they would working with our closest competition.
