

What is SMARTLOADER ?

SmartLoader is TopBloc's one-of-a-kind acceleration technology. It automates data processes, from extraction to validation, to reduce historically manual processes and lessen the resourcing requirements of Workday deployments.

A TOOL FOR EFFICIENCY

SmartLoader makes migration to Workday less resource-intensive by leveraging technology to automate what have historically been manual processes for our clients. Specifically, SmartLoader streamlines the data extraction, migration, verification, and import processes inherent in Workday deployments.

SmartLoader enables clients to deploy their tailored Workday solutions more efficiently without sacrificing quality, resulting in:

- **Faster Timelines:** SmartLoader imports legacy data and organizes it into a readable format that can be quickly reviewed, validated, and approved for bulk import into Workday. Features such as automated workbook population save your employees from hours of mundane copy-and-pasting, while preset upload configurations containing TopBloc's recommendation for best practice setup guide your team through an optimized Workday deployment.
- **Less Risk:** Because SmartLoader does the heavy lifting, you don't have to worry about human errors such as data being copied over incorrectly, typos, or data duplication. SmartLoader even automates data validation to enable quicker verification and review of workbooks.
- **Fewer Resourcing Requirements:** With key capabilities including push-button tenant migration, SmartLoader makes it easy to manage a transition to Workday with minimal oversight. With SmartLoader, you'll be able to focus more attention on design decisions and optimizing unique solutions to best suit your business.

LESS WORK, MORE WORKDAY

At TopBloc, we pride ourselves on our ability to drastically reduce resourcing requirements, enabling clients to remain focused on their business while they gain immediate value from their new Workday platform.

We developed SmartLoader to eliminate inefficiencies, lessen menial tasks, streamline manual processes, and deliver accelerated results.

Our technology-driven approach enables our consultants to expedite deployment timelines and pass meaningful savings back to our clients. This means that our customers see their Workday solutions deployed faster with us than they would with other Workday consultants – and they save money through investing in a more efficient use of resources.
