

POWERING

WORKDAY SUCCESS

WITH TECHNOLOGY & AI

Our Proprietary Technology: Proven Innovation

Our commitment to technology began with SmartLoader, the original automation tool for Workday deployments, reducing time and effort for data migrations. Since then, we've introduced SmartBundles and AuditPro, each designed to optimize and streamline Workday implementations and management.

Our tools enable clients to:

Automate Routine Tasks: Save time by reducing manual effort with SmartLoader.

Gain Personalized Insights: Identify key data patterns and prevent payroll errors with AuditPro.

Optimize System Health: Monitor and analyze Workday configurations with our Tenant Health Dashboard.

AI-Enabled Efficiency: The Future of Workday Services

AI is reshaping enterprise systems, and TopBloc is at the forefront of this transformation. While we don't sell AI as a standalone product, we integrate AI-driven enhancements across our services to:

- ✓ **Deliver Predictive Analytics:** Forecast workforce trends and financial insights.
- ✓ **Enhance Automation:** Expand the capabilities of our tools to accelerate Workday operations.
- ✓ **Surface Actionable Intelligence:** Provide smarter recommendations based on historical data.
- ✓ **Improve Adaptive Learning:** Continuously refine best practices to drive better business decisions.

WHY CHOOSE TOPBLOC?

- **Deep Workday Expertise:** A trusted leader in Workday consulting & deployment.
- **Proprietary Tools:** Industry-recognized solutions that drive measurable results.
- **AI-Backed Innovation:** Forward-thinking enhancements to improve client success.
- **Continuous Investment:** Ongoing development to keep our clients ahead of the curve.

Unlock the power of technology with TopBloc. Contact us today to learn how our intelligent solutions can optimize your Workday experience.
